

# IOTA/ES Workshop

# QHY 174M GPS

2020 February 29

Archenhold-Sternwarte Berlin

Local Organising Team: Konrad Guhl, Christian Weber, Nikolai Wünsche | all IOTA/ES

# Agenda

11.00 Welcome

## Part 1: Introduction to basic use

11.10 Presentation and live demonstration

12.00 Workshop on your own computer

13.00 Lunch break

## Part 2: Introduction to advanced use

13.30 Presentation and live demonstration

14.15 Workshop on your own computer

15.45 Wrap up and outlook

16.00 End of workshop

IOTA/ES Workshop

**QHY 174M GPS**

**1 Introduction to Basic Use**

2020 February 29

Archenhold-Sternwarte Berlin

Christian Weber | IOTA/ES

# 1 Introduction to basic use | Outline

---

1.1 Examples      Positive events with QHY174GPS

1.2 Hardware      Camera

Adaptation to the telescope

Adaptation to the PC / other HW

1.3 Software      Driver

Recording

Data reduction

1.4 Useful links

# 1.1 Examples: Pos. events w. QHY174GPS

Chr. Weber

## System:

Intel i7 2.2GHz

Total Physical Memory 16.3GB

Available Physical Memory 11.6GB

Operating System: MS W7 Home Premium

OS is 64bit, SharpCap is 32bit; SSD

Almost everything in these presentations is done with this system

## SC settings for all:

Format: SER

Resolution: 16bit

Binning: 1x1

LED-Calibr.: CSP=0, CEP=1000  
( = no calibration)

SC free version, 32bit

# 1.2 Hardware | Camera

## 1.2 Hardware | Adaptation to the telescope

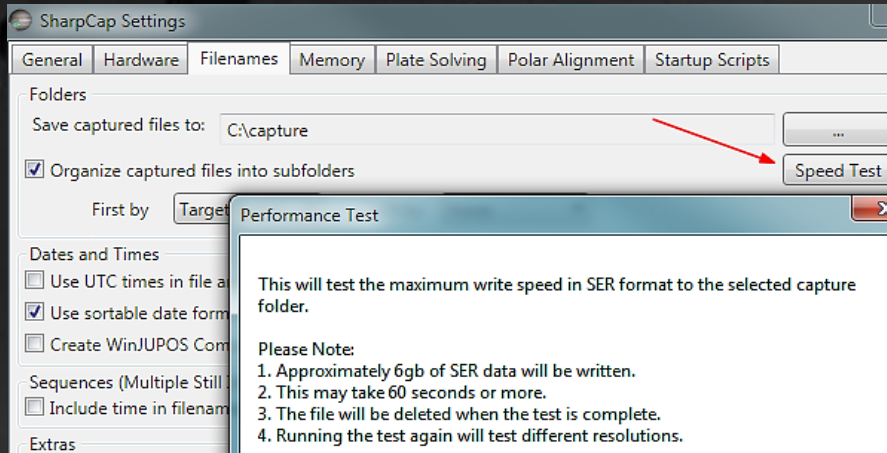

## 1.2 Hardware | Adaptation to the telescope

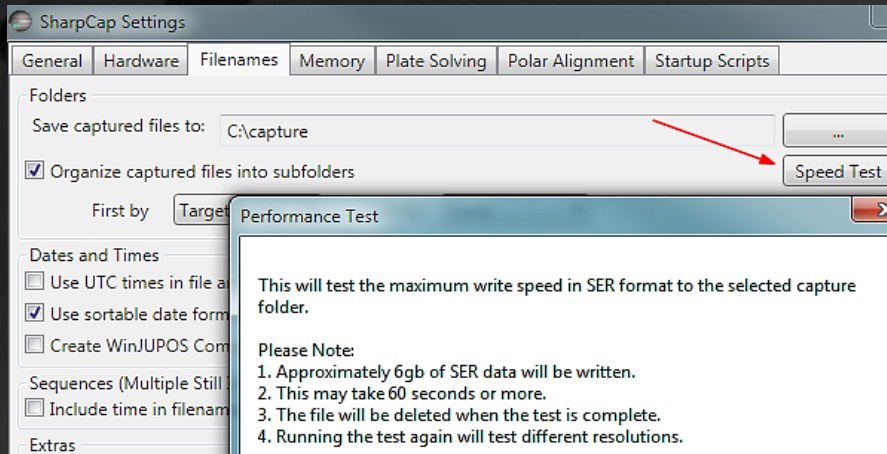

# 1.2 Hardware | Adaptation to the PC / other HW

**PC:** Check / disable all for occultation recording *not required SW / services ...*,  
Check / avoid carefully (MS) updates (especially W10!), provide enough RAM,  
Record on a (dedicated) SSD; work with *administrator rights*

# 1.2 Hardware | Adaptation to the PC / other HW

**PC:** Check / disable all for occultation recording *not required SW / services ...*,  
Check / avoid carefully (MS) updates (especially W10!), provide enough RAM,  
Record on a (dedicated) SSD

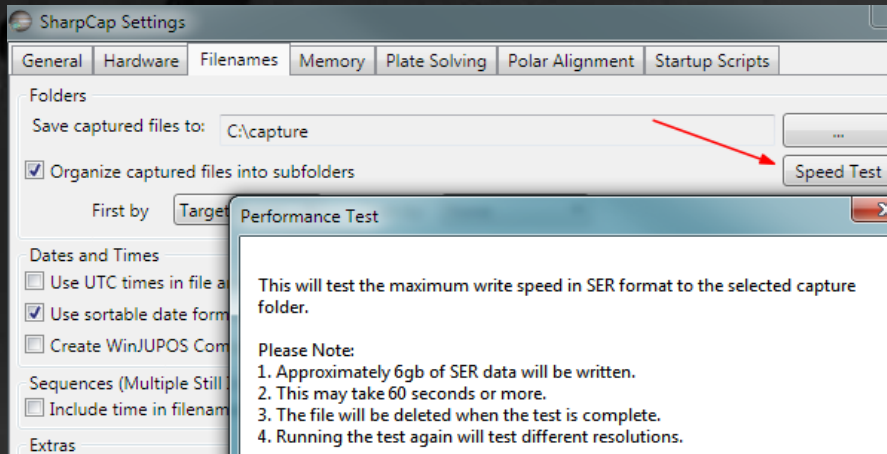

**USB:** *Real USB-3 connection*, original cable, high quality cables, < 2-3m,  
*Powered* high quality hubs *can* work,  
Check PC's USB-powering (System control / Energy options ...),  
In case of USB problems: <https://forums.sharpcap.co.uk/viewtopic.php?f=18&t=349>

# 1.2 Hardware | Adaptation to the PC / other HW

**PC:** Check / disable all for occultation recording *not required SW / services ...*,  
Check / avoid carefully (MS) updates (especially W10!), provide enough RAM,  
Record on a (dedicated) SSD

**USB:** *Real USB-3 connection, original cable, high quality cables, < 2-3m, Powered high quality hubs can work, Check PC's USB-powering (System control / Energy options ...), In case of USB problems: <https://forums.sharpcap.co.uk/viewtopic.php?f=18&t=349>*

**12V:** *Only for cooling required, cooling recommended - at least for the actual event, Up to 3A required!, Cool down / up slowly (planned SC-feature), So far no optical window dew problem - window is heated*

# 1.2 Hardware | Adaptation to the PC / other HW

Antenna: Needs *free sight* to the sky, for timing tests GPS required – indoor with extension cables

For extension cables look for:  
„Eightwood SMA Kabel SMA Male  
auf SMA Bulkhead Jack Pigtail  
Kabel RG174 16.5ft" (Amazon)

<https://de.aliexpress.com/item/32796598520.html>

# 1.2 Hardware | Adaptation to the PC / other HW

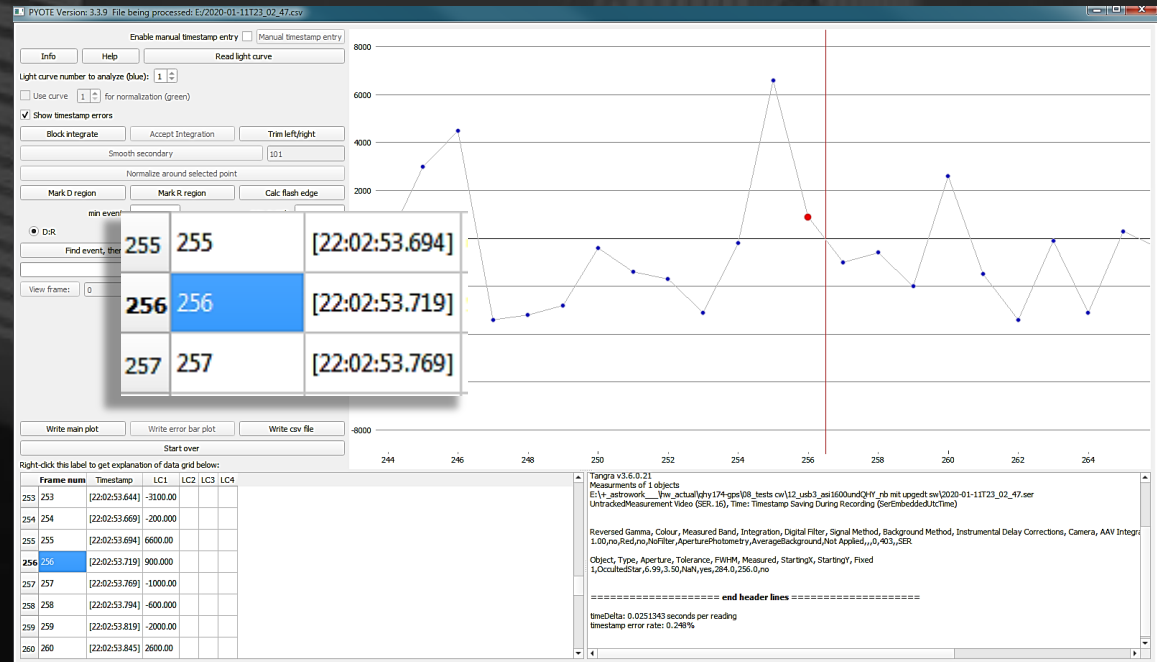

Antenna: Needs *free sight* to the sky, for timing tests GPS required – indoor with extension cables

For extension cables look for:  
„Eightwood SMA Kabel SMA Male auf SMA Bulkhead Jack Pigtail Kabel RG174 16.5ft“ (Amazon)

<https://de.aliexpress.com/item/32796598520.html>

Event: Make a *test record* immediately before the event. This should also include a quick reduction (Tangra). Look for *dropped frames* and *timing inaccuracies*. Adapt the HW settings.

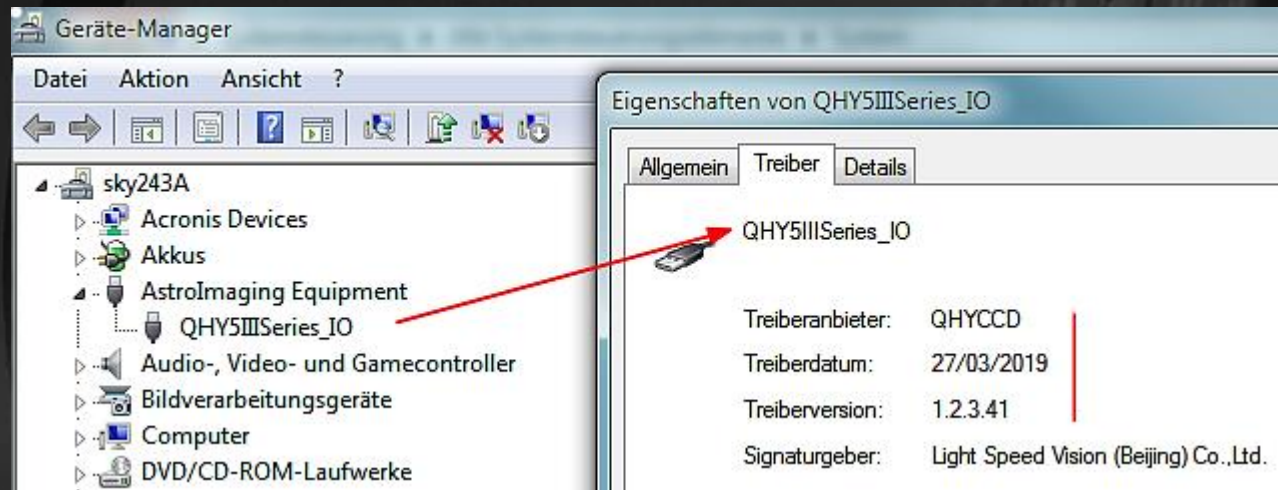

TANGRA > PyOTE  
found dropped  
frame  
(see part 2)

# 1.3 Software | Driver

**QHY Driver:** Only 1 driver for all QHY-cameras: „QHY5IIISeriesDriver“:  
<https://www.qhyccd.com/file/repository/latestSoftAndDirver/Driver/QHY5IIISeriesDriverLatestEdition.zip>

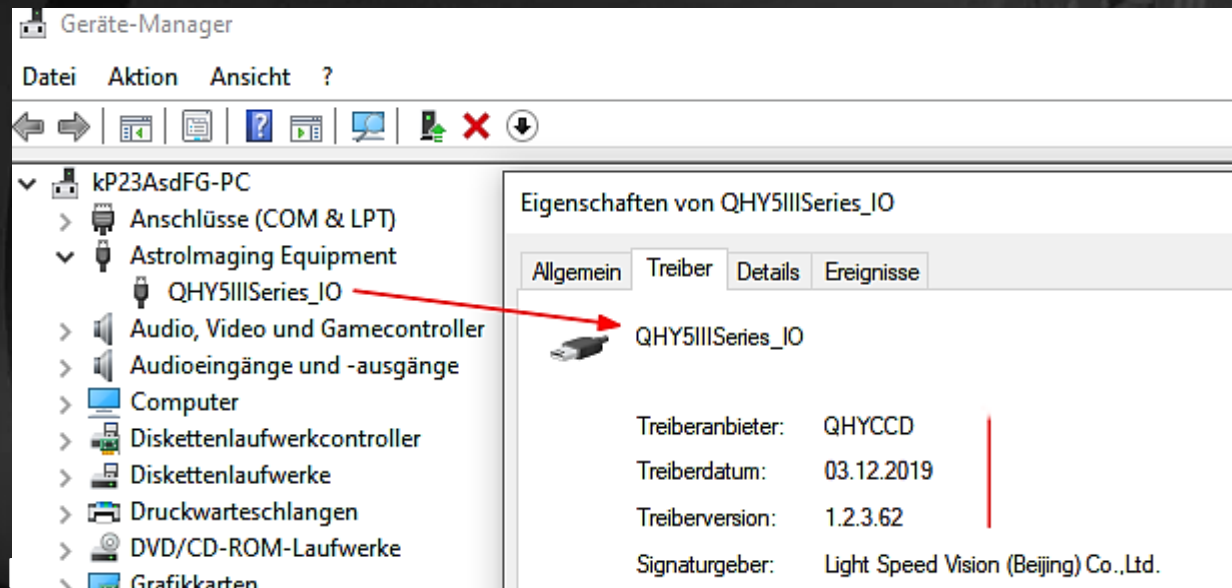

As of 2020 Feb 11: **QHY5IIISeriesDriver200203win7.exe**

QHY Driver: USB Tree Viewer:  
<https://www.uwe-sieber.de/usbtreview.html>

The screenshot shows the USB Device Tree Viewer V3.3.7 interface. On the left, a tree view displays the USB hierarchy. A red arrow points to the 'QHY5III Series IO' device under the 'Intel(R) USB 3.0 eXtensible-Hostcontroller'.

On the right, the 'USB Port5' section shows connection status and port chain information:

```
=====  
Connection Status : 0x01 (Device is connected)  
Port Chain       : 3-5  
=====
```

The 'USB Device' section shows detailed information:

```
+++++ Device Information +++++  
Device Description : QHY5IIISeries_IO  
Device Path       : \\?\usb#vid_1618&pid_c175#5&21e302b&0&5#{a5dcbf10-6530-1  
Device ID        : USB\VID_1618&PID_C175\5&21E302B&0&5  
Hardware IDs     : USB\VID_1618&PID_C175&REV_0000 USB\VID_1618&PID_C175  
Driver KeyName   : {94f18cec-ca64-40f6-9a81-17a67720abf0}\0003 ({94F18CEC-C  
Driver           : system32\DRIVERS\QHY5IIISeries_IO.sys (Version: 1.2.3.10  
Driver Inf       : C:\Windows\inf\oem121.inf

```

At the bottom, a summary bar indicates: Host Controllers: 3 Root Hubs: 3 Standard Hubs: 2 Peripheral Devices: 3

# 1.3 Software | Recording

## Rec. SW:

At the moment, *SharpCap* is the only software that fulfills all the requirements of occultation work. SC supports all functions of the camera.

<https://www.sharpcap.co.uk/sharpcap/downloads>

SC 3.2... for W7 – W10, 32 bit version (also for 64 bit OS)

*Pro version* (12.00 EUR p. a.) recommended (among others: Extended Memory Support, Preprocessing, Scripting ...)

# 1.3 Software | Recording

## Rec. SW:

At the moment, *SharpCap* is the only software that fulfills all the requirements of occultation work. SC supports all functions of the camera.

<https://www.sharpcap.co.uk/sharpcap/downloads>

SC 3.2... for W7 – W10, 32 bit version (also for 64 bit OS)

*Pro version* (12.00 EUR p. a.) recommended (among others: Extended Memory Support, Preprocessing, Scripting ...)

## Install:

You *can* overinstall... (the personal SC settings will remain)

To be safe: Backup your personal settings (see next page)

Uninstall the old version

(Optionally) clean the registry:

HKEY\_CURRENT\_USER\SOFTWARE\RWG\SharpCap

# 1.3 Software | Recording

SharpCap paths (W7-64 bit):

**Program:** C:\Program Files (x86)\SharpCap 3.2\

**Capt. profiles:** C:\Documents and Settings\Administrator\AppData\Roaming\SharpCap\CaptureProfiles\

**SC logfiles:** C:\Documents and Settings\Administrator\Local Settings\SharpCap\logs\

**Captures:** Chosen capture folder according to SC settings

**GPS logfiles:** 1 layer above capture folder

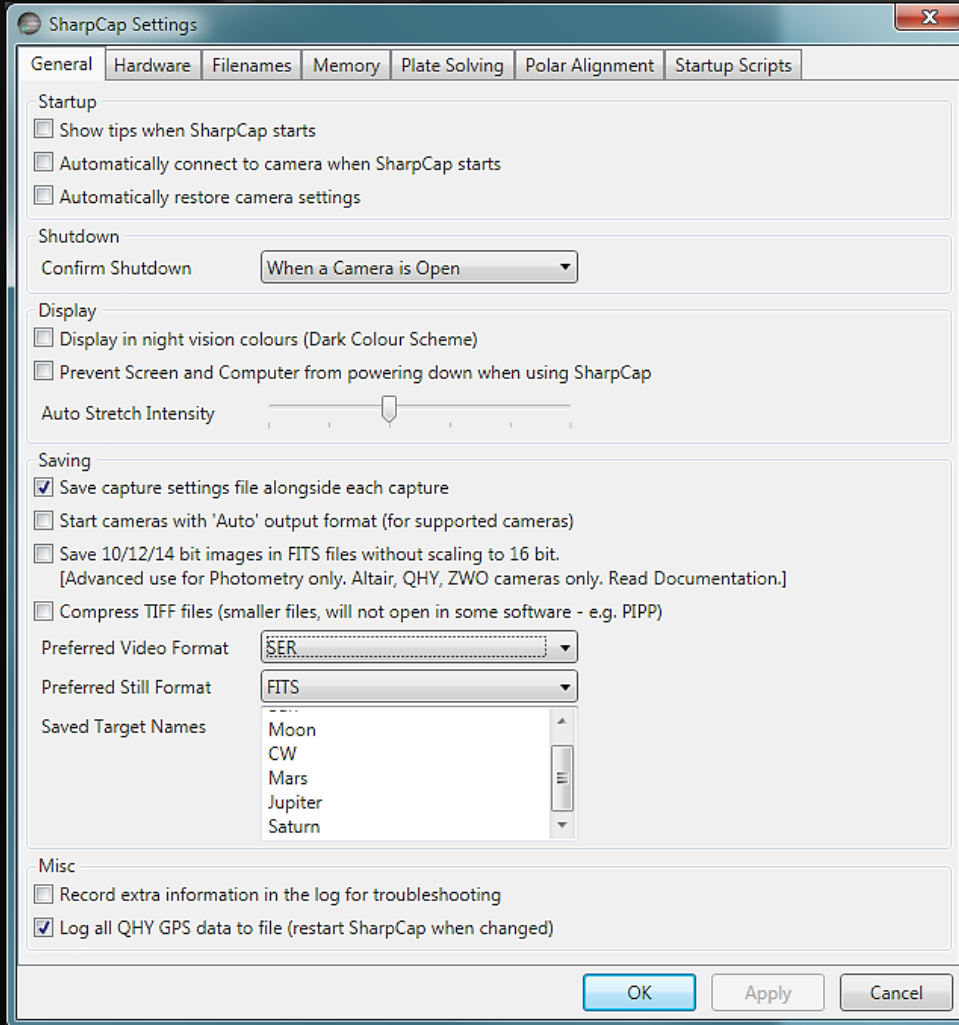

**Optional:** C:\Documents and Settings\Administrator\AppData\Local\Temp\  
plate solved

# 1.3 Software | Recording

The screenshot shows the SharpCap Pro (v3.2.6226) interface. The main window displays a dark, noisy video feed. A 'GPS Status' window is open in the foreground, showing the following data:

```
GPS Status
-----
Status      : Locked
Sequence #  : 3410
Latitude    : 52.5
Longitude   : 13.4
Start       : 2020-02-12T20:40:07.000000Z
Start (us)  : 316282.5
End        : 2020-02-12T20:40:07.000000Z
End (us)    : 416370.3
Now        : 2020-02-12T20:40:07.000000Z
Now (us)    : 416370.3
PPS Counter: 9999993
Exp. (us)  : 100087.8
Sys Clock  : 0.014s behind GPS
System/GPS offset stable for : 0:00:49
```

Below the data, the window contains the following text:

Once the GPS has a status of 'Locked' you can set the system time to the GPS time.  
To set the system time you must run SharpCap as Administrator.  
Choose a short exposure and high frame rate to ensure an accurate sync.

A button labeled "Set PC Time to GPS Time" is located at the bottom of the window.

The main interface on the right shows the 'Camera Control Panel' for 'QHY-SC-DEFAULT'. Key settings include:

- Colour Space: MONO16
- Capture Area: 640x480
- Binning: 1x1
- Output Format: SER file (\*.ser)
- Exposure: 100 ms
- Gain: 480
- Frame Rate Limit: Maximum
- GPS Status: On

The status bar at the bottom indicates: "Previewing : 2789 frames (0 dropped) in 0:04:40, 10.1 fps | Memory: 1 of 7246 frames in use. | Cooler: 100%, Temp 26.1C, Target 0.0C"

Many thanks to:

Robin Glover For providing and continuous development of SharpCap

Hristo Pavlov Developer of TANGRA

Dave Herald Developer of Occult / AOTA

Bob Anderson Developer of PyMovie, PyOTE

Th. Midavaine For providing a SEXTA device (developed by Tony Barry and Dave Gault)

IOTA/ES For providing a QHY174GPS test model

Colleagues of the worldwide community for suggestions and valuable discussions

**Thank You**
